DIEGO SCHACHT

Software Engineer

About Me

AWS certified Software Engineer with 5+ years building serverless platforms for global brands like Porsche, Kärcher, and Bosch. Implemented DDD / event-driven microservices, CI/CD, and translating complex cloud architectures into clear business impact.

Skills:

AWS · Serverless · Microservices · TypeScript · Node.js · Java · NoSQL · DynamoDB · Docker · RESTful · GraphQL · AWS CDK · React · CI/CD · Event-Driven Architecture · Monitoring · Prometheus Grafana · Teamwork · Continuous Learning

Certifications:

AWS Solutions Architect Professional (WIP)
AWS Developer Associate (2023)
AWS Cloud Practitioner (2021)

Education:

B.Sc. Business Informatics (Wirtschaftsinformatik) | 2017- 2021
SRH Hochschule Heidelberg, Heidelberg
German Paraguayan University, Paraguay

Languagues:

Spanish (Native) - English (C1) - German (B1) - Portuguese (B1) - French (A2)

Experience:

Software Engineer

Zoi TechCon GmbH - Kärcher | Stuttgart
2021 - Present

- **Architected end-to-end solutions,** using C4 diagrams, sequence diagrams, IPO models and inter-service dependency, guiding projects from concept through implementation and testing, maintaining a separation between problem space (business domains) and solution space (technical implementation).
- **Designed event-driven, serverless backend** on AWS (Lambda, API Gateway, SQS, StepFunctions, DynamoDB) for the Kärcher IoT Cloud Platform, supporting 100K+ global devices, ensuring global scalability and availability.
- **Engineered a real-time production system for Porsche's assembly lines,** implementing GraphQL APIs, developing interactive 3D UIs with React and Babylon.js, cross-account, cross-VPC communication via AWS PrivateLink.
- **Automated infrastructure** CloudFormation, CDK and CI/CD pipelines (GitHub & GitLab), reducing deployment time by 50%.
- **Presented technical designs and demos** to stakeholders, translating complex architectures into business value, securing alignment with product, sales and executive teams.

Software Engineer Intern / Thesis

Bosch Engineering GmbH | Abstatt
2020 - 2021

- **B.Sc. thesis:** "Using microservices metrics for cost-efficient cloud deployments," building an open-source monitoring stack (Prometheus, Jaeger, Grafana) to drive autoscaling and cost insights.
- Developed a cloud-robotics (Docker, Kubernetes) platform to coordinate multi-vendor robots.
